Turkey Breeders Participating in the U. S. Record of  
Performance Breeding Stage of the National Turkey Improvement Plan

The publication of this list is for the purpose of developing greater efficiency in the operation of the National Turkey Improvement Plan. Additional information regarding these breeders may be obtained by writing to them or to the TURKEY ROP supervisors in their respective States.

The list shows the number of single-tom matings, the number of hens trap-nested and the pullorum classification for each flock. Due to the fact that the trapnesting of turkeys under ROP supervision is relatively new, the majority of the matings comprise ROP and ROM candidates. The letters "ROP" or "ROM" following the names of the breeders indicate that some of the matings on these farms are qualified ROP or ROM matings.

Flocks, matings, and hens trapnested, by varieties, Spring of 1949
